

Why Customers **LOVE** our Lights

UNMATCHED!

DROP, SLAM, THROW, and DRAG! Even voltage fluctuations are no match for our GREEN LIGHTS™.

NO COMPROMISE!

From design, manufacturing, and service, no cut corners results in lights with years of use.

Lumens+
Optics

NO DOWNTIME!

We listen. This allows us to constantly improve, resulting in customers reporting little to **NO DOWNTIME!**™

TRUST EARNED!

For over 48 years, we've exceeded expectations, providing lighting solutions for hazardous work sites from wastewater treatment to the Space Station.

ABOUT US

Our Corporate Focus

In 1978, Western Technology, Inc. built our first light and deadman remote control specifically designed for the severe environments of abrasive blasting. Since then, Western Technology has built a business on **solving problems related to lighting critical, and often difficult to get to, temporary workspaces.**

“Welcome to Western Technology. Our corporate focus is designing world-class, portable, LED work lights...each recognized for their “tool-like” reliability in the demanding workspaces of our marine, industrial, and aviation clients. Built in the  and certified to meet the most stringent safety standards.” – Jim Giese, President

GREEN LIGHTS™ SERIES

Explosion Proof | Ordinary Location | Abrasive Blast

We present our proprietary series of **GREEN LIGHTS™** Portable LED Safety Work Lights
Industrial-strength with “tool-like” reliability

Explosion Proof | LED Lights

- 1 **THE BRICK®** : PORTABLE AREA LIGHT
- 2 **THE BRICKETTE™** : PORTABLE WORK LIGHT
- 3 **THE STRIKER™** : PORTABLE INSPECTION DROP/WORK LIGHT
- 4 **BODYLIGHT™** : CORDLESS, RECHARGEABLE EXPLOSION PROOF LIGHT
- 5 **STRIKE FORCE™** : STRING LIGHT CONNECTOR FOR THE STRIKER™ LIGHT HEAD
- 6 **THE SIDEKICK™** : CORDLESS, RECHARGEABLE WITH THE STRIKER™ LIGHT HEAD
- 7 **BRICKSKID™** : ZERO-EMISSIONS EXPLOSION PROOF LIGHT TOWER

Ordinary Location | LED Light

- 8 **LINKALIGHT™** : LED STRINGER LIGHT SYSTEM

Abrasive Blast | LED Light

- 9 **3475™** : LED BLAST LIGHT

 Designed + Manufactured + Serviced in the USA

SEE THE DIFFERENCE

Redefining Portable Lighting

Western Technology builds portable lights trusted for their “tool-like” reliability. They set a new standard of excellence:

Reduce Job Site Safety Risks

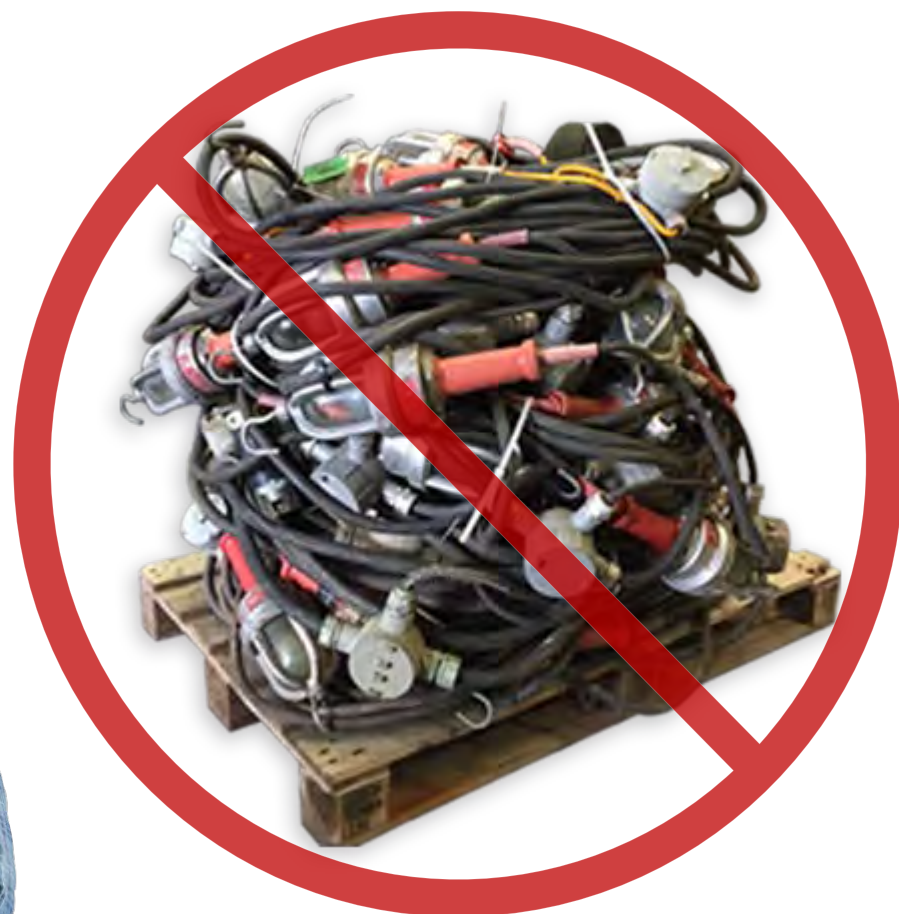

- accidents caused by lights failing or breaking

Easy-to-Calculate ROI

- reduction of number of Lights required
- reduction in installation/removal time
- minimal maintenance
- reduction in cost to operate
- improved productivity
- reduced CO₂ emissions

SAFETY BEYOND CERTIFICATION

Proven Reliability Under Extreme Conditions

EXPLOSION
PROOF
LIGHTING

Our Explosion Proof Line of **GREEN LIGHTS™** LED Safety Lights are **designed** to meet your most demanding workplace requirements. *Each light is purposely built:*

- For **SAFETY** and **CERTIFIED** for Hazardous Locations:
 - Class I, Division 1 & 2, Groups C & D
 - Class II, Division 1 & 2, Groups E, F, & G
 - CSA Zones 1, & 2; Zones 20, 21, & 22
 - Constant thermal monitoring for maintaining safe T-code temperature
- For **WET LOCATION**: Watertight and certified
(Our lights have been tested up to 100 psi, so you can operate them with confidence in wet environments)
- For **FLEXIBILITY**: Each system of lights has versatile magnetic/mechanical mounting options.
- For **VISUAL AID**: Choices include light shielding, light projection, light diffusion, color temperature control
- For **PROTECTION**: Polyurethane bumpers wrapping the lights & optional safety straps.
- For **DURABILITY**: Constructed out of fully-machined solid blocks of aluminum.

”

“...We finished our project of removing all 8 tanks of fuel foam from our decommissioned static display today. I cannot explain how having that light in there helped with the safety and visual comfort doing the work...”

- SUPERINTENDENT
US AIR NATIONAL GUARD

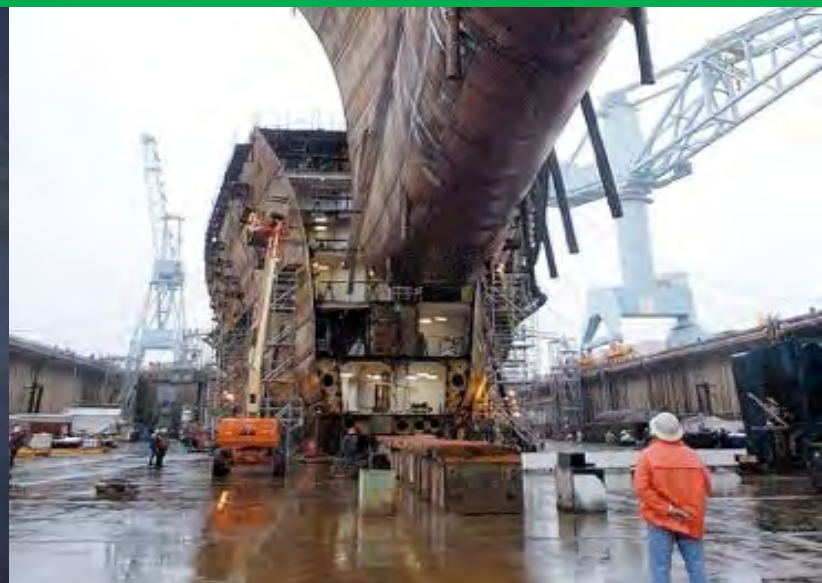

WEATHER-PROOF LIGHTING

Proven Reliability in All Weather Conditions

**EXPLOSION
PROOF
LIGHTING**

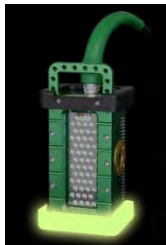

Rated Type 6P

Submersible...depends on specified conditions of pressure and time; example use in quarries, mines, and manholes. Type 6 is temporarily submersible, Type 6P withstands occasional prolonged submersion. Neither are intended for continuous submersion

(Tested to 200 ft depth in Water for 72 hours)

Explosion Proof Battery Pack Transportation Compliance

The Western Technology 8910 Lithium-ion Battery Pack is certified to be safely transported by air, sea, rail, or roadways under Standard UN38.3: Transportation Testing for Lithium Batteries and Cells. The 8910 Battery was repeatedly tested to extremes outside of the explosion-proof canister and passed all testing for Altitude Simulation, Thermal, Vibration, Shock, External Short Circuit, and Overcharge, confirming it to be fully safe and compliant for transportation. The 8910 Battery is further contained inside a certified explosion-proof canister, giving even greater protection and confidence in its transportation safety. The full testing is documented in Intertek Report No.:103190396CRT-002.

”

“Immediately after receiving the first light we ordered, I requested a second one as the performance was absolutely incredible.

“The light has been a big hit on the rig and other departments are always asking to borrow ours. I plan on ordering several others for them. The magnetic knuckle really makes tank entry a breeze.

“Please keep in contact with us, especially if you have any new products that are generated. Thanks for all your help!”

”

“Here are the responses I’ve received on the BRICK’s® performance:

Portability: Does not need to be on a stand.

Durability: Can be accidentally knocked over and still performs.

Light output: Outstanding.

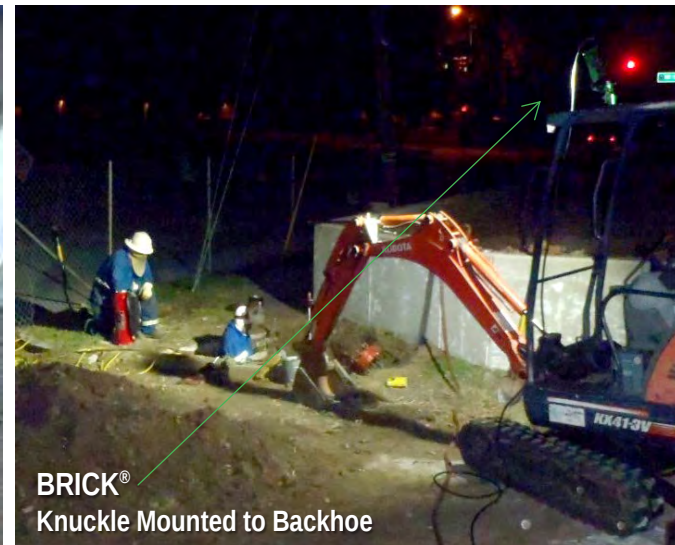

Adapters: Stands, tripods, etc are all well made.

Heat Sink: Unit cools quickly and can be stored without much down time.

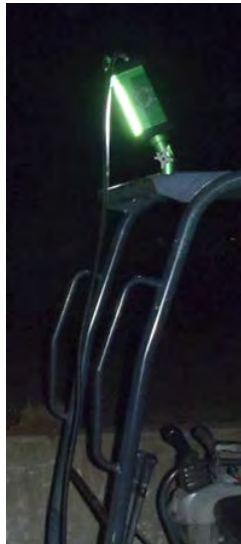

Cord: Strong & long enough to meet the demands of the field.

Overall, the best outside lighting in/out of a gaseous atmosphere anyone has used.”

IMPERIAL OIL RMA 93104

This is an early Gen1 Brick built July 2013. The DC cable was swollen with petroleum products, cuts, and very fatigued. Replaced cable, nuts, cord grip w/basket, access gasket, cement seal, and crimp pins. The AC cable, cord grip, and plug are worn; replaced the AC cable double layer shrink and cord grip w/basket, cement seal, and crimps. The lens is intact but heavy with staining/pitting; replaced, include a no charge shim, gasket, and optic. The light heads bumpers are worn; replace both, re-use the bumpers on the power supply. The mounting rings will have to be upgraded to nitril coated rings to bring the light into compliance. The LEDs, dual DC supply, drivers, and thermal control work. Installed a blast shield and hi-pot certify.

Network of Distributors and Rental Partners Across North America

Our Portable LED Work Lights, known for their “tool-like” reliability, are also available for rent.

We have a network of distributors and rental partners across the U.S. and Canada. This is a cost-effective way to work with our portable LED work lights. Call us today to see if rentals are available in your area.
