

### Arena Lighting:

Arena lighting needs to be bright & uniform enough for riders and fans to see. Our LED upgrades add:

- ◆ Improved visual performance for contestants & judges
- ◆ Increased safety for spectators at the venue
- ◆ Better visibility, so better video recording & playback
- ◆ Instant ON / No restart delay after power loss
- ◆ Significant energy & maintenance savings
- ◆ Full arena design & installation, including supply of new poles if necessary

### Why Work With Slatercom?

- ◆ Almost 20 years experience with LED lighting technology as a company
- ◆ Nationwide coverage
- ◆ Extensive lighting design skills & experience including computerized photometric design, removes the “guess work”
- ◆ No cost on-site lighting audits
- ◆ Over 100 distribution agreements with leading LED manufacturers
- ◆ Trade ally partners for most utilities in the Pacific Northwest, to get you max energy incentive rebate dollars & lower costs
- ◆ Installation Flexibility. We have a network of certified electricians or can work with qualified school maintenance staff
- ◆ Multiple staff NXT LEVEL certified, adds significant lighting knowledge & training!

## Made in America Products!

Slatercom offers multiple manufacturers with high quality, American made products.

MADE IN USA

## Portable / Temporary Lighting:

Slatercom has multiple portable and temporary lighting systems. These systems are perfect for temporary events or areas that do not always require light.

## Solar Options:

If your facility has areas without power, perhaps the best solution for safety & security is to incorporate solar lights. Slatercom has multiple lighting options to help you light difficult spaces.

## Interior / Exterior Lighting

Most existing lighting will be a combination of fluorescent, metal halide, and high pressure sodium. Upgrading from these to LED will result in higher energy savings and increased performance. Slatercom offers:

- ◆ Tightly sealed fixture options protect components against dust and bug build-up, along with water from animal wash downs or stormy weather
- ◆ LED technology saves approximately 65% electricity over MH or HPS technology .
- ◆ Our LED lights are brighter and thus enhance safety & security.
- ◆ Upgrading to quality LED fixtures virtually eliminates maintenance
- ◆ Controls including dimmers and occupancy sensors could save up to 50% additional energy.
- ◆ Indoor, outdoor and stage lighting options for fair-ground events and concert venues.
